1. PREPARATION OF FINANCIAL STATEMENTS

The financial statement of the Company has been drawn up in accordance with applicable Financial Reporting Standards in Singapore ("FRS") and each applicable of a FRS, effective for the financial year in the preparation of the financial statements.

Adoption of new and revised standards effective in 2024.

In the current financial year, the Company has adopted all the new and revised FRS and Interpretations of FRS ("INT FRS") that are relevant to its operations and effective for annual periods beginning on or after 1 January 2024.

The adoption of these standards did not result in changes to the Company's accounting policies and had no material effect on the amount reported for the current or prior years.

FRS and INT FRS issued but not yet effective.

At the date of authorization of these statements, the following FRS and INT FRS that are relevant to the Company were issued but not effective:

Description	Effective date (Annual periods beginning on or after)
• Amendments to FRS 21 The Effects of Changes in Foreign Exchange Rates: Lack of Exchangeability	1 January 2025
• Amendments to FRS 109 Financial Instruments and FRS 107 Financial Instruments: Disclosures: Amendments to the Classification and Measurement of Financial Instruments	1 January 2026
• Annual Improvement to FRSs Volume 11	1 January 2026
• FRS 118 Presentation and Disclosure in Financial Statements	1 January 2027

The directors expect that the adoption of the standards above will have no material impact on the financial statements in the year of initial application.

2. CORPORATE INFORMATION AND PRINCIPAL ACTIVITIES

The Company is a private limited company incorporated and domiciled in the Republic of Singapore with its registered office located at 51 Goldhill Plaza, #20-07, Singapore 308900. The company's registration number is 202312235M.
The principal activity of the company are that of development of computer games and publishing of games software / applications. There have been no significant changes in the principal activity of the Company.

The directors have authorised the financial statements for issue in accordance with a resolution of the directors on the date of the Directors' Statement.

3. MATERIAL ACCOUNTING POLICY INFORMATION

a. Basis of financial statement preparation.

The financial statements have been drawn up in accordance with the provisions of the Singapore Companies Act 1967 and Singapore FRS including related INT FRS.

Basis of measurement

The financial statements have been prepared on the historical cost basis except as otherwise described in the notes below.

Functional and presentation currency

These financial statements are presented in United States Dollar ("US$"), which is the Company's functional currency.

Significant accounting estimates and judgements

The preparation of the financial statements in conformity with FRS requires management to exercise its judgement in the process of applying the Company's accounting policies.

It also requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the financial year. Although these estimates are based on management's best knowledge of current events and actions, actual results may differ from those estimates.

The critical accounting estimates and assumptions used and areas involving a high degree of judgements are described below:

Expected credit losses (ECL) on trade receivables

The allowance for ECL is established on the basis of making debtor specific impairment loss provision, which is based on the assessment of the ability of individual debtors who are credit impaired, and for remaining trade receivable balances by determining the default rates to be applied against trade receivables after the specific impairment loss provision.

The assessment of the debtor's ability to pay are based on the age of the balances, payment history, status of negotiations with debtors and other external information available to management to assess the creditworthiness of the debtor.

The default rates are based on the Company's historical credit loss experience, profiling customers by credit risk characteristics and are adjusted for forward-looking factors specific to the debtors and the economic environment.

The carrying amounts of the Company's trade receivables are disclosed in Note 4.

Determination of functional currency

The Company measures foreign currency transactions in the functional currencies of the Company. In determining the functional currencies of the Company, judgment is required to determine the currency that mainly influences operating expenses and the currency that generates funds from financing activities.

The functional currencies of the Company are determined based on management's assessment of the economic environment in which the Company operate and the Company's process of determining operating expenses which is assessed to be United States Dollar (US$).

b. Plant and equipment and depreciation of plant and equipment

Plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses, if any.

The cost of an item of plant and equipment is recognised as an asset if, and only if, it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

Depreciation is provided on straight-line monthly basis so as to write-off the cost of the assets over their estimated useful lives. The annual rates of depreciation used per annum are:

Computer equipment	3 years
Office equipment	3 years

Fully depreciated plant and equipment are retained in the financial statements until they are no longer in use and no further charge for depreciation is made in respect of these plant and equipment.

During the financial year, the fully depreciated plant and equipment have been removed from assets register.

c. Foreign currency

Items included in the financial statements of the Company are measured using the currency that best reflects the economic substance of the underlying events and circumstances relevant to the Company ("the functional currency"). The financial statements of the Company are presented in US$, which is also the functional currency of the Company.

Foreign currency transactions

Transactions in foreign currencies are recorded in US$ by applying the foreign currency amount to the exchange rate between the US$ and the foreign currency at the date of transaction. At each statement of financial position date, monetary items denominated in foreign currencies are retranslated at the rates prevailing on the reporting date.

Exchange difference arising on the settlement of monetary items or on reporting the Company's monetary items at rates different from those at which they were initially recorded during the financial year or reported in previous financial statements, are recognised as profit or loss in the period in which they arise.

d. Financial assets

Financial assets are recognised on the Company's statement of financial position when the Company becomes a party to the contractual provisions of the instrument.

Initial recognition and measurement

Financial assets are recognised when, only when the entity becomes party to the contractual provisions of the instruments. At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss ("FVTPL"), transaction costs that are directly attributable to the acquisition of the financial assets. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss.

Amortised cost

Financial assets that are held for the collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Financial assets are measured at amortised cost using the effective interest method, less impairment. Gains and losses are recognised in profit or loss when the assets are derecognised or impaired, and through amortisation process.

Classification

Financial assets are classified into the following specified categories:

- Amortised cost;
- Fair value through other comprehensive income ("FVOCI"); and
- Fair value through profit or loss ("FVTPL").

The classification of debt instruments depends on the Company's business model for managing the financial assets as well as the contractual terms of the cash flows of the financial assets.

* Company does not hold financial assets at FVOCI or FVTPL for the current financial year.

At subsequent measurement

The Company classifies the following financial assets at amortised cost:

- Trade receivables;
- Other receivables; and
- Cash and bank balances.

Trade receivables
Trade receivables that do not have a significant financing component are measured at their transaction price at initial recognition, and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses.

Other receivables (including amount due from related party)

Other receivables that do not have a significant financing component are measured at their transaction price at initial recognition, and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses.

Cash and bank balances

Cash and bank balances include cash in hand and deposits with financial institutions.

Impairment of financial assets

The Company recognises a loss allowance for expected credit losses ("ECL") on investments in debt instruments that are measured at amortised cost or at FVOCI, lease receivables, contract assets, as well as on loan commitments and financial guarantee contracts. Lifetime ECL represents the ECL that will result from a possible default event over the expected life of a financial instrument.

The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The Company always recognises lifetime ECL for trade receivables, contract assets and lease receivables. The ECL on these financial assets are estimated using a provision matrix based on the Company's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

Derecognition

A financial asset is derecognised where the contractual right to receive cash flows from the asset has expired or are transferred and substantially all of the risks and rewards of ownership have been transferred.

e. Financial liabilities

Financial liabilities are recognised on the Company's statement of financial position when the Company becomes a party to the contractual provisions of the instrument.

Subsequent measurement

The Company measures all financial liabilities subsequently at amortised cost, except for those financial liabilities at fair value through profit or loss. Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as either financial liabilities at FVTPL or other financial liabilities. Financial liabilities are classified as at FVTPL if the financial liability is either held for trading or it is designated as such upon initial recognition.

Trade and other payables (including amount due to a director cum shareholder)

Trade and other payables are initially measured at fair value, net of transaction costs, and are subsequently measured at amortised cost, where applicable, using the effective interest rate method, with interest expense recognised on an effective yield basis.

Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or they expire.

f. Income tax

The charge for current tax is based on the results for the year as adjusted for items, which are non-assessable or disallowed. It is calculated using tax rates that have been enacted or substantively enacted by the reporting date.

Deferred income tax is provided in full, using the liability method and is provided at the current taxation rate on all temporary differences existing at the reporting date between the tax bases of assets and liabilities and their carrying amounts in the financial statements.

Deferred tax liabilities are recognised for all taxable temporary differences. However, if the deferred income tax arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects either accounting or taxable profit or loss, it is not accounted for.

Deferred tax assets are recognised for all deductible temporary differences to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilised.

Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

g. Share capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issuance of new equity instruments are taken to equity as a deduction, net of tax, from the proceeds.

h. Revenue recognition

Revenue is measured based on the consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties. Revenue represents net invoiced value.

Revenue is recognised when the Company satisfies a performance obligation by transferring a promised good or service to the customer, which is when the customer obtains control of the good or service. A performance obligation may be satisfied at a point in time or over time. The amount of revenue recognised is the amount allocated to the satisfied performance obligation.

Grants are received from the Government of Singapore and its related agencies. The income recognise at the point of cash received from the Government.

i. Impairment of assets

The carrying amounts of the Company's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount. Recoverable amount is defined as the higher of value in use and net-selling price.

Impairment losses are charged to the profit or loss.

An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount or when there is an indication that the impairment loss recognised for the asset no longer exists or decreases.

An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been recognised.

4. TRADE RECEIVABLES

Trade receivables are non-interest bearing and are generally on 90 to 180 days' terms. They are recognised at their original invoice amounts which represents their fair values on initial recognition.

Trade receivables are denominated in the following currencies:	**2024 US$**
USD	1,220,000
S$	-
	1,220,000

Loss allowance for trade receivables has always been measured at an amount equal to lifetime ECL. The ECL on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date.

Management has assessed that all receivables are not impaired and collectible and based on previous experience no ECL allowance is required for the current year as at 31 December 2024.

5. OTHER RECEIVABLES

	2024 US$
Deposit (refundable)	3,000
	3,000

6. TRADE AND OTHER PAYABLES

Trade payables are denominated in US$ non-interest bearing and normally settled on 90 to 180 days terms.

	2024 US$
Trade and other payables	1,500,000
	1,500,000

7. AMOUNT DUE TO SHAREHOLDER

These amounts dominated in US$ are interest free, unsecured and repayable on demand.

8. SHARE CAPITAL

Ordinary shares with no par value	**2024**	**2024 US$**
Issued and fully paid	Number of ordinary shares	
Balance at 1 January	100,000	100,000

Tax effect of income not taxable	-
Tax effect of expenses not deductible for tax purpose	-
Deferred tax assets (recognised) / not recognised	-
	0

The tax computation for the current year is yet to be agreed by the Comptroller of Income Tax.

11. FINANCIAL RISK MANAGEMENT AND INSTRUMENTS

The Company is exposed to financial risks arising from its operations and the use of financial instruments and has adopted risk management policies that seek to mitigate these risks in a cost-effective manner.

This note presents information about the Company's exposure to each of the above risks, and further quantitative disclosures are included throughout these financial statements.

a. Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

The Company's credit risk is primarily attributable to its trade and other receivables and cash and bank balances.

The credit risk is minimal as majority of transactions are with companies, which is in sound financial position.

Information regarding financial assets that are either past due or impaired are disclosed in Note 4.

The director is of the opinion that the balances are recoverable and no allowance for doubtful debts is required.

Cash is held with reputable financial institutions of good standing. No other financial assets carry a significant exposure to credit risk.

b. Liquidity risk

Liquidity or funding risk is the risk that an enterprise will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may also arise from an inability of the Company to sell a financial asset quickly at close to its fair value.

The Company monitors its liquidity risk by considering the maturity of both its financial assets and liabilities and projected cash flows from operations.

c. Fair values

The carrying amounts of cash and bank balances, trade and other current receivables and payables, approximate their respective fair values due to the relative short-term maturity of these financial instruments.

In view of the above, the Company do not anticipate that the carrying amounts recorded at statement of financial position date would be significantly different from the values that would eventual be received or settled.

d. Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates.

The Company monitors its foreign currency exposures on an ongoing basis and ensures that the net exposure is kept to an acceptable level.

12. CAPITAL RISK MANAGEMENT

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and net current asset position to support its business and maximize shareholder value. The capital structure of the Company comprises issued share capital and retained earnings.

In order to maintain or achieve an optimal capital structure, the director regularly reviews the Company's capital structure with a view for the Company to pay its debts as and when they fall due.

The Company is not subject to any externally imposed capital requirements. There were no changes in the Company's approach to capital management during the financial year end.

	2024 US$
