Unlocking Value, Unleashing Growth

OHM EV PTE. LTD.
(Incorporated in Singapore)

COMPANY REGISTRATION NO: 202142108Z

FINANCIAL YEAR ENDED 31 DECEMBER 2024

STATUTORY REPORTS

OHM EV PTE. LTD.
(Incorporated in Singapore)

DIRECTOR'S STATEMENT

The director presents this statement to the member together with the audited financial statements for the financial year ended 31 December 2024.

In the opinion of the director,

(a) the financial statements are drawn up so as to give a true and fair view of the financial position of OHM EV Pte. Ltd. (the company) as at 31 December 2024 and the financial performance, changes in equity and cash flows of the company for the financial year covered by the financial statements; and

(b) at the date of this statement, there are reasonable grounds to believe that the company will be able to pay its debts as and when they fall due.

Options

During the financial year, there were no options granted to any person to take up unissued shares in the company.

There were no shares issued during the financial year by virtue of any exercise of option to take up unissued shares.

There were no unissued shares under option as at 31 December 2024.

Name of Director

The director of the company in office at the date of this statement is:

Ye Xiang (Appointed on 7 July 2025)

Arrangements to Enable Directors to Acquire Shares or Debentures

Neither at the end of the financial year nor at any time during that year was the company a party to any arrangement whose object was to enable the directors of the company to acquire benefits by means of the acquisition of shares or debentures in the company or any other body corporate.

Director's Interest in Shares and Debentures

None of the director of the company holding office had any interests in the shares or debentures of the company and or any related corporations either at the beginning or at the end of the financial year as recorded in the Register of Directors' Shareholdings kept by the company under Section 164 of the Companies Act 1967.

THE SOLE DIRECTOR

YE XIANG

INDEPENDENT AUDITOR'S REPORT TO THE MEMBER OF
OHM EV PTE. LTD.
(Incorporated in Singapore)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

In our opinion, the accompanying financial statements are properly drawn up in accordance with:

- the provisions of the Companies Act 1967 (the Act); and
- Financial Reporting Standards in Singapore (FRSs)

so as to give a true and fair view of the financial position of OHM EV Pte. Ltd. (the company) as at 31 December 2024; and the financial performance, changes in equity, and cash flows for the year ended on that date.

The financial statements we have audited comprise:

- the statement of financial position as at 31 December 2024;
- the statement of comprehensive income for the year then ended;
- the statement of changes in equity for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, including material accounting policy information.

Basis for Opinion

We conducted our audit in accordance with Singapore Standards on Auditing (SSAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the company in accordance with the Accounting and Corporate Regulatory Authority (ACRA) Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities (ACRA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. The other information comprises the Directors' Statement but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Directors for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Act and FRSs, and for devising and maintaining a system of internal accounting controls sufficient to provide a reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition; and transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair financial statements and to maintain accountability of assets.

In preparing the financial statements, management is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

The director's responsibilities include overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SSAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the director regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

In our opinion, the accounting and other records required by the Act to be kept by the company have been properly kept in accordance with the provisions of the Act.

OHM EV PTE. LTD.
(Incorporated in Singapore)

NOTES TO THE FINANCIAL STATEMENTS - 31 DECEMBER 2024

1. GENERAL INFORMATION

The company is a limited liability company incorporated under Singapore Companies Act 1967 and is domiciled in Singapore.

As at the year end, the immediate holding company is Hyva Asia Holdings Pte. Ltd., incorporated in Singapore. The ultimate holding corporation is JOST Werke SE, incorporated in Germany. The company is wholly-owned by Hyva Asia Holdings Pte. Ltd..

On 7 July 2025, the company's immediate holding company, Hyva Asia Holdings Pte. Ltd., disposed of its entire shareholding in the company to Newhorizon Capital Pte. Ltd.. Following the disposal, Newhorizon Capital Pte. Ltd. became the company's immediate and ultimate holding company.

The principal activity of the company is that of wholesale of electric motor vehicles.

The company's registered address is at 12 Marina View, #11-01 Asia Square Tower 2, Singapore 018961 and the principal place of business is at 194 Pandan Loop #04-24, Singapore 128383.

2. MATERIAL ACCOUNTING POLICY INFORMATION

2.1 Going concern basis

As at 31 December 2024, the company has a capital deficit of SGD5,997,784. The director is of the opinion that the company will have sufficient resources to meet its liabilities as they fall due and that the financial statements are prepared on a going concern basis.

2.2 Basis of accounting

The financial statements are prepared in compliance with Financial Reporting Standards in Singapore issued by Accounting and Corporate Regulatory Authority.

The financial statements are presented in Singapore dollar.

The financial statements are prepared in accordance with the historical cost convention except as disclosed in the accounting policies below.

The financial statements for the financial year ended 31 December 2024 are authorised to be issued on the date of the Directors' Statement.

2.3 Adoption of new and amended standards and interpretations

The accounting policies adopted in the financial year are consistent with those used in the previous financial year except for the adoption of certain new and amended standards and interpretations effective for the financial year beginning 1 January 2024. It may be possible to apply these changes early. There is no early adoption of these new and revised standards. These new and revised Financial Reporting Standards have no significant effects on the material accounting policy used.

2.4 Issued but not yet effective Financial Reporting Standards

As at the date of this report, no new or revised Financial Reporting Standards that have been issued but not yet come into effect beginning on or after 1 January 2025 has been applied.

2.5 Significant judgements by the directors in applying accounting policies

In the process of applying the company's accounting policies, the directors did not make any significant judgements, apart from those involving estimations, that have a significant effect on the amounts recognised in the financial statements.

2.6 Key sources of estimation uncertainty

The preparation of financial statements in conformity with Financial Reporting Standards in Singapore requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the financial statements, and the reported amounts of income and expenses during the financial year Although these estimates are based on the directors' best knowledge of current events and actions, actual results may differ from those estimates.

There were no significant key assumptions concerning the future, nor other key sources of estimation uncertainty at the year end that would have significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year except for:

(i) Depreciation of plant and equipment

The estimates for the residual values, useful lives and related depreciation charges for the plant and equipment are based on commercial and production factors which could change significantly as a result of technical innovations and competitors' actions in response to the market conditions.

The company anticipates that the residual values of its plant and equipment will be insignificant. As a result, residual values are not being taken into consideration for the computation of the depreciable amount.

Changes in the expected level of usage and technological development could impact the economic useful lives and the residual values of these assets, therefore future depreciation charges could be revised.

(ii) Amortisation of intangible asset

The estimates for the residual values, useful lives and related amortisation charges for the intangible asset are based on commercial and production factors which could change significantly as a result of technical innovations and competitors' actions in response to the market conditions.

The company anticipates that the residual values of its intangible asset will be insignificant. As a result, residual values are not being taken into consideration for the computation of the amortised amount.

Changes in the expected level of usage and technological development could impact the economic useful lives and the residual values of these assets, therefore future amortisation charges could be revised.

(iii) Income taxes

There are certain transactions and computations for which the ultimate tax determination may be different from the initial estimate. The company recognises tax liabilities based on its understanding of the prevailing tax laws and estimates of whether such taxes will be due in the ordinary course of business. Where the final outcome of these matters is different from the amounts that were initially recognised, such difference will impact the income tax and deferred tax provisions in the year in which such determination is made.

(iv) Impairment of non-financial assets

When the recoverable amount of an asset is determined based on the estimate of the value-in use of the cash-generating unit to which the asset is allocated, the management is required to make an estimate of the expected future cash flows from the cash-generating unit and also to apply a suitable discount rate in order to determine the present value of those cash flows.

(v) Allowance for inventory obsolescence

The company makes allowance for inventory obsolescence based on an assessment of lower of cost and net realisable value of the inventories. Allowances are applied to inventories where events or changes in circumstances indicate that the cost may be lower than the net realisable value. Management specifically analyses the ageing of the inventories and demand for the inventories when making a judgement to evaluate the adequacy of the allowance for inventories obsolescence. Where the expectation is different from the original estimate, such difference will impact the net realisable value of the inventories.

2.7 **Intangible asset**

Intangible asset is initially stated at cost. Subsequent to initial recognition, intangible asset is stated at cost less accumulated amortisation and accumulated impairment losses.

The amortisation year and amortisation method of intangible asset is reviewed at least at end of each financial year. The effects of any revision are recognised in the statement of comprehensive income when the changes arise. The estimated useful lives of the intangible assets are as follows:

	No. of years
Software	5
Homologation	3

2.8 **Subsidiaries**

A subsidiary is a company in which the group, directly or indirectly, holds more than half of the issued share capital, or controls more than half of the voting power, or controls the composition of the board of directors.

Investments in subsidiaries are stated at cost less impairment losses in the company's separate financial statements.

On disposal, the difference between disposal proceeds and the carrying amounts of the investments are recognised in the statement of comprehensive income.

2.9 **Plant and equipment and depreciation**

Plant and equipment are initially stated at cost. Subsequent to initial recognition, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation of an asset commences when the asset is available for use. Depreciation is provided on gross carrying amounts less residual value in equal annual instalments over the estimated useful lives of the assets. The estimated useful lives of the assets are as follows:

	No. of years
Computer hardware	3

The residual value and the estimated useful lives of an asset is reviewed at each year end, and if expectations differ from previous estimate, changes are made to the depreciation charge for the remaining undepreciated amount.

Fully depreciated assets are retained in the financial statements until they are no longer in use or disposed and no further charges for depreciation is made in respect of these assets.

Any gain or loss arising from the derecognition of the asset is recognised in the statement of comprehensive income.

When events or changes in circumstances indicate that the carrying amount of an asset is not recoverable, impairment loss is recognised in the statement of comprehensive income.

2.10 **Inventories**

Inventories are stated at the lower of cost and net realisable value, cost being determined on the weighted average basis. In arriving at net realisable value, due allowance is made for obsolete, slow moving and damaged items.

2.11 **Financial assets**

Financial assets, except for investment in subsidiary, are classified as ‘fair value through profit or loss’, ‘amortised costs’, or ‘fair value through other comprehensive income’ financial assets. Financial assets are recognised in the statement of financial position when the company becomes a party to the contractual provisions of the financial assets.

All financial assets are initially recognised at fair value plus any directly attributable transactional costs, except for trade receivables at their transaction price if the trade receivables do not contain a significant financing component in accordance with FRS 115. The classification of financial assets, after initial recognition, is re-evaluated and reclassified where allowed and appropriate.

All financial assets are measured at fair value through profit or loss unless they are measured at amortised cost or at fair value through other comprehensive income.

2.12 **Trade and other receivables**

Trade and other receivables are classified and accounted for as ‘amortised cost financial assets’ as the contractual cash flows of the assets comprise solely principal and interest payments and these financial assets are held by the entity with the objective to collect contractual cash flows. These assets are carried at amortised cost using the effective interest method except trade receivables carried at transactional price as it does not contain a significant financing component in accordance with FRS 115.

The carrying amount of receivables impaired by measuring expected credit losses is reduced by an allowance amount unless the company ascertains the amount to be uncollectible whereby the receivables will be reduced directly. Expected credit losses is measured in a way that reflects an unbiased and probability weighted amount that is determined by evaluating a range of outcomes, time value of money and reasonable and supportable information that is available without undue cost or effect at the year end about past events, current conditions and forecasts of future economic conditions.

Gains or losses are recognised in the statement of comprehensive income when these loans and receivables are derecognised or impaired, as well as through the amortization process.

2.13 **Cash at banks and on hand**

Cash at banks and on hand are classified and accounted for as ‘amortised cost financial assets’ as they are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These assets are carried at amortised cost using the effective interest method.

Gains or losses are recognised in the statement of comprehensive income when these assets are derecognised or impaired, as well as through the amortisation process.

2.14 **Cash and cash equivalents**

Cash and cash equivalents included in the statement of cash flows comprise cash on hand and non-restricted bank balances.

2.15 **Impairment of non-financial assets**

As at each year end, non-financial assets other than inventories are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognised in the statement of comprehensive income unless it reverses a previous revaluation credited to reserve.

The recoverable amount is the higher of an asset's net selling price and value in use. The net selling price is the amount realisable from the sale of the asset in an arm's length transaction. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of the asset and from its disposal at the end of its useful life. Recoverable amounts are estimated for individual assets or, if impossible to be estimated individually, for the cash-generating unit in which the asset is deployed.

Reversal of an impairment loss previously recognised is recorded to the extent the impairment loss had previously been recognised. A reversal of an impairment loss on a revalued asset is credited directly to reserve, unless the impairment loss on the same revalued asset was previously expensed in the statement of comprehensive income, in which case it is recognised as income.

2.16 **Trade and other payables**

These liabilities, which are normally settled on 30 – 90 days terms, including non-trade payable to related corporations are financial liabilities. Financial liabilities are recognised on the statement of financial position when, and only when, the company becomes a party to the contractual provisions of the financial instrument. Financial liabilities are initially recognised at fair value of consideration received less directly attributable transaction costs and subsequently measured at amortised cost using the effective interest method.

Gains or losses are recognised when the liabilities are derecognised as well as through the amortisation process. The liabilities are derecognised when the obligation under the liability is discharged, cancelled or expire.

2.17 **Provisions**

Provisions are recognised when the company has a present obligation as a result of a past event which is probable and will result in an outflow of economic benefits that can be reliably estimated.

2.18 **Lease liabilities**

Lease liabilities are initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the company's incremental borrowing rate of similar asset. Generally, the company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprises the following:

- Fixed payments, including in-substance fixed payments
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date
- Amounts expected to be payable under a residual value guarantee; and
- The exercise price under a purchase option that the company is reasonably certain to exercise, lease payments in an optional renewal year if the company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the company is reasonably certain not to terminate early

Lease liabilities are measured at amortised cost using the effective interest method. They are remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the company's estimate of the amount expected to be payable under a residual value guarantee, or if the company changes its assessment of whether it will exercise a purchase, extension or termination option. A lessee shall use an unchanged discount rate, unless the change in lease payments results from a change in floating interest rates.

When a lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

2.19 **Equity instruments**

An equity instrument is any contract that evidences a residual interest in the assets after deducting all liabilities. Equity instruments are recorded at the proceeds received, net of direct issue costs.

2.20 **Share capital**

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity.

2.21 **Revenue from contracts with customers**

A contract involves agreement between two or more parties that creates enforceable rights and performance obligations.

The company recognises revenue when an enforceable performance obligation is satisfied and it is identifiable separately from other promises in the contract. Performance obligation involves a transfer of control of distinct goods and services to a customer where customer can benefit from the goods or services on its own or together with readily available resources in the market.

The company will allocate transaction price to each performance obligation on the basis of the stand-alone selling prices of each distinct good or service promised in the contract. The company can use estimated price when stand-alone price is not observable. Discount, rebates and consideration that are generated through the synergy of the contract as a whole should be allocated to one or more, but not all performance obligations.

Revenue from sale of goods is recognised when control of the goods has transferred, being when the goods are delivered to the customer, and there is no unfulfilled obligation that could affect the customer's acceptance of the goods. Delivery occurs when the goods have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the goods in accordance with the sales contract, the acceptance provisions have lapsed, or the customer has objective evidence that all criteria for acceptance have been satisfied.

All electric motor vehicles sold by the company include standard warranty which requires the company to either repair or replace the defective vehicles or spare parts during the warranty year. The warranty against defects is not accounted for as a separate performance obligation. Provision for warranty is recognised separately based on the industry average of expected claims and level of repairs and returns.

A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

2.22 **Employee benefits**

Employee benefits, which include base pay, cash bonuses, contribution to defined contribution plans such as the Central Provident Fund and other staff-related allowances, are recognised in the statement of comprehensive income when incurred. For defined contribution plans, contributions are made to publicly or privately administered funds on a mandatory, contractual or voluntary basis. Once the contributions have been paid, there will be no further payment obligations.

Employee entitlement to annual and other leave is recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the year end.

2.23 Taxation

The charge of current tax is based on the results for the year as adjusted for items which are non-assessable or disallowed.

Deferred tax is provided in full, using the liability method, on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements.

Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, carry forward of unused tax assets and losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each year end and is reduced to the extent that it is no longer probable to be utilised against future taxable profits.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same tax authority and the company intends to settle its tax assets and liabilities on a net basis.

The tax rates used to determine deferred tax are based on tax rates and tax laws that have been enacted at the year end.

2.24 Functional currency

Functional currency is the currency of the primary economic environment in which the entity operates. The financial statements are prepared using Singapore dollar as the functional currency.

2.25 Foreign currency transactions

Foreign currencies transactions are recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction. All transactions in currencies other than the functional currency are treated as transaction in foreign currencies.

At the year end, foreign currency monetary assets and liabilities are converted into the functional currency at the spot rate at the year end. Exchange differences are taken to the statement of comprehensive income.

2.26 Offsetting financial instruments

Certain financial assets and liabilities offset each other and the net amount is reported in the statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle them on a net basis, or realise the asset and settle the liability simultaneously.

3. SHARE CAPITAL

	2024 SGD	2023 SGD
Issued and fully paid 1 ordinary share	1	1

The ordinary share has no par value and the company has no authorised share capital. The holder of the ordinary share is entitled to receive dividends as and when declared by the company. The ordinary share carries one vote per share without restriction.

4. PLANT AND EQUIPMENT

Recharge of staff costs	-	(481,501)
Payment on behalf	-	(468,702)
Management fee	(68,266)	(45,509)
Interest expenses on loan	(273,325)	(239,928)
Legal and professional fees	-	(72,587)
Travelling expense	-	(72,403)
Recharge of staff bonus	-	(30,124)

19. FINANCIAL RISK MANAGEMENT

The company's operations carry certain financial risks, including the effects of foreign currency exchange rates and credit risk. The company's overall risk management approach is to moderate the effects of such volatility on its financial results. There are no changes to the company's objectives, policies or processes relating to the management of the company's financial risk during the financial year.

The responsibility for managing the below risks is vested in the directors.

a) Market risk

i) Foreign exchange risk

The company's exposure to foreign exchange risk arises mainly from its sales and purchase transactions which are denominated in Euro, Chinese Yuan and United States Dollar. The company periodically reviews the monetary assets and liabilities held in foreign currencies to ensure that the net exposure is kept to an acceptable level.

The company does not enter into any derivative foreign exchange contracts to hedge its currency risks.

The company's exposure to foreign exchange risk is as follows:

	In Euro	In Chinese Yuan	In United States Dollar
	SGD	SGD	SGD
As at 31 December 2024			
Financial assets:			
Trade receivables	398,221	-	-
Financial liabilities:			
Trade payables	(10,595)	-	(73,264)
Trade payable to the subsidiary	-	(4,272,441)	-
Non-trade payable to related corporations	(1,346,947)	-	(142,639)
Other payables	(260,478)	(19,567)	(28,347)
	(1,618,020)	(4,292,008)	(244,251)
Currency exposure			
- Net financial liabilities	(1,219,799)	(4,292,008)	(244,251)
Effect of 1% change in Singapore dollar on:			
- Loss before taxation	12,198	42,920	2,443
- Equity	-	-	-
As at 31 December 2023			
Financial assets:			
Cash at banks and on hand	530	8,988	11,196
Trade receivable	296,685	-	-
Trade receivable from a related corporation	4,983	-	-
	302,198	8,988	11,196
Financial liabilities:			
Trade payables	(7,286)	-	(27,911)
Trade payable to the subsidiary	-	(1,341,229)	-
Non-trade payable to related corporations	(1,161,807)	-	(71,723)
Other payables	(389,442)	(19,206)	-
	(1,558,535)	(1,360,435)	(99,634)
Currency exposure			
- Net financial liabilities	(1,256,337)	(1,351,447)	(88,438)
Effect of 1% change in Singapore dollar on:			
- Loss before taxation	12,563	13,514	884
- Equity	-	-	-

ii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of financial instrument will fluctuate because of changes in market interest rates.

The company's exposure to interest rate risk for changes in interest rate relates primarily to non-trade payable to a related corporation.

Changes in market interest rates of 1% (2023: 1%) on interest bearing financial assets and financial liabilities as at year end will have the effect on the financial statements as follows:

	2024 SGD	2023 SGD
Loss before taxation	49,633	46,899
Equity	-	-

The above analysis assumes all other variables are held constant.

b) Credit risk

Credit risk is the risk that other parties to financial instruments will fail to discharge their obligations to the company. Credit risk is managed through the application of reminders and on-going monitoring procedures.

The maximum exposure to credit risk is represented by the carrying amount of financial assets which are mainly trade receivables and bank balances. However, trade receivables has been carefully evaluated and is known to be financially sound and the company placed its cash with creditworthy financial institutions.

At the year end, there is concentration of credit risk on trade receivables as follows:

	2024 SGD	2023 SGD
Top 1 customer	397,688	296,685
Top 2 customer	446,503	4,983
Top 3 customer	533	-

Financial assets that are neither past due nor impaired

Trade receivable that is neither past due nor impaired is with company that has a good collection track record or that the recoverability is not in doubt.

Financial assets that are past due and/ or impaired

There is no other class of financial assets that is past due and/ or impaired except for trade receivable.

The age analysis of trade receivable past due and/ or impaired is as follows:

	2024 SGD	2023 SGD
Past due 1 - 30 days	773,343	301,668
Past due 31 - 60 days	71,381	-

No impairment has been made on this amount as the company is closely monitoring the receivable and is confident of its eventual recovery.

c) Liquidity risk

The company manages its liquidity position with a view to meet its obligations on a timely basis. The company measures and manages its cash flow requirements regularly and constantly monitors its sources of funds to ensure that these sources yield the funds required to meet its obligations.

All the company's financial liabilities are due within 1 year.

d) Fair value risk

The fair value of the company's financial assets and financial liabilities reported in the statement of financial position approximates their carrying value.

e) Derivative instruments

The company does not utilise any derivative instruments.

20. FINANCIAL INSTRUMENTS

Classification of financial instruments

Financial assets and financial liabilities are measured on an ongoing basis either at fair value or at amortised cost. The material accounting policies in Note 2 describes how the classes of financial instruments are measured, and how income and expenses, including fair value gains and losses, are recognised. The following table analyses the financial assets and liabilities in the statement of financial position by the class of financial instrument to which they are assigned, and therefore by the measurement basis:

	Financial assets at amortised cost SGD	Financial liabilities at amortised cost SGD	Total SGD
As at 31 December 2024			
Assets			
Trade receivables	398,221	-	398,221
Trade receivable from the immediate holding company	446,503	-	446,503
Other receivables, deposits and prepayments	19,908	-	19,908
Cash at banks and on hand	1	-	1
Total financial assets	864,633	-	864,633
Total non-financial assets			5,247,231
Total assets			6,111,864
Liabilities

Trade payable to the subsidiary	-	(1,341,229)	(1,341,229)
Non-trade payable to related corporations	-	(5,923,458)	(5,923,458)
Other payables and accruals	-	(409,805)	(409,805)
Total financial liabilities	-	(7,709,689)	(7,709,689)
Total non-financial liabilities			(511,285)
Total liabilities			(8,220,974)

21. CAPITAL RISK MANAGEMENT

The company's objectives when managing capital are to safeguard the company's ability to continue as a going concern in order to maximise returns to shareholders and other stakeholders; and to maintain an optimal capital structure to reduce the cost of capital. The director regularly reviews and monitors its capital position to ensure that the business activities and growth are prudently funded. The company seeks to maintain a positive net current asset position and capital surplus position.

	2024 SGD	2023 SGD
Current assets	1,340,252	1,372,624
Current liabilities	(12,109,648)	(8,220,974)
Net current liabilities	(10,769,396)	(6,848,350)
Total assets	6,111,864	5,800,306
Total liabilities	(12,109,648)	(8,220,974)
Capital deficit	(5,997,784)	(2,420,668)

In order to maintain or adjust the capital structure, the company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

There are no changes on the company's objectives, policies or processes relating to the management of the company's capital structure during the year.

The company is not subject to any externally imposed capital management and is not in breach of any debts covenant made with its lenders.

22. **SUBSEQUENT EVENTS**

On 12 June 2025, Hyva Asia Holdings Pte. Ltd. made an additional investment in the company by subscribing for 1,100,000 ordinary shares at SGD1,100,000.
